PocketSmart AI – Smart Budget & Recommendation Assistant

Project Planning

- Phase 1: identify the budgeting problem and define the PocketSmart AI concept.
- Phase 2: identify user, functional and technical requirements.
- Phase 3: design the frontend, backend, database and AI workflow.
- Phase 4: implement authentication, budget calculations, recommendations and saved plans.
- Phase 5: test API functions, frontend build and user workflows.
- Phase 6: prepare documentation and project demonstration.
